A photograph of the Castillo de Peralada at dusk. The castle's stone walls and two prominent towers with crenellated tops are illuminated from below, casting a warm glow. The lower walls are covered in dense green ivy. In the foreground, a calm pond reflects the lights and the sky. The sky is filled with soft, colorful clouds. To the right, a paved area and some trees are also lit up.

## Dive into nature!

Removing invasive exotic plants from the Ter river by kayak.

### KAYAK DEL TER

3-4 hours  
 May - June and September - October  
 Min. 20 / Max. 80  
 Starting from €25 / pers.

This activity combines kayaking down the Ter river while removing invasive exotic plants, such as *Ludwigia peploides*. An experience in nature and for nature, to reduce the impact of these plant species as you enjoy kayaking down the river. This company adheres to the European Charter for Sustainable Tourism. It is essential to be able to swim.

## Help small land stewardship producers

### EMYS FOUNDATION

3 hours  
 Spring (April-May) and autumn (October-November)  
 Min. 20 / Max. 40  
 Starting from €35 / pers.

The Emys Foundation has signed a dozen land stewardship agreements with local organic crop and livestock farmers. Our main goal is to work with them to implement ecological farming and livestock practices with high nature value (HNV) that are capable of sustaining high levels of biodiversity, which in turn aids conservation. The organisation has been working for many years with a programme to foster land stewardship. However, many small farmers who want to apply ecological and HNV practices have very few resources available to make the necessary investments and changes on their properties. We aim to support the Emys Foundation's land stewardship producers so that they can adapt their properties and carry out possible actions to promote ecological farming in Selva county.

#### Organisations that receive the social benefit of this activity:

Properties owned by land stewardship producers

## Sand traps. Restoring the dune system in the bay of L'Estartit-Pals

### HUMANSIDE EXPERIENCES

2-3 hours  
 Year-round  
 Min. 12 / Max. 80  
 Starting from €35 / pers.

Project to restore the dune ridge in the bay of L'Estartit-Pals to recover a protected habitat that is home to endemic species. The aim is to restore the ecosystem functionality following the loss of sand outside the beach-dune system and, by doing so, protect the natural beaches as a fundamental asset of the Baix Ter - Montgrí Natural Park.

#### Organisations that receive the social benefit of this activity:

Generalitat de Catalunya  
 Parc Natural del Montgrú, les Illes Medes i el Baix Ter

#### To which SDGs does it contribute:

L'Estartit - Pals beach
